

THINKS MAN HAS MET FOUL PLAY BURKE WITNESS HAS DISAPPEARED

West Berkeley Engineer Has Not Been Heard From For Month.

BERKELEY May 11.—Pair of foul play has led to a desperate search for James M. Burke, supervisor of the census, and the police are becoming more and more anxious about his fate. Burke was last seen on May 1st, and has not been heard or seen since. His wife, Mrs. Burke, said that his family life was happy, and he was employed in a good position, the police purporting to know that his disappearance was not due to any personal trouble. He was employed on one of the existing vessels touching at the West Berkeley wharf, and it was thought he might have been made a good offer to go on a voyage up the coast.

The Boosters of Annexation.

Former Mayor of Oak Naph B. Greensfelder Victor Robertson of Berkeley and Dr. I. W. D. Evelyn of Alameda have undertaken to annex Oakland to San Francisco. Their sponsorship of the annexation scheme is the best evidence that could be presented of its triviality and unpatriotism. Mr. Oliver stated in San Francisco that every business man in Oak and he had discussed the matter with is in favor of the annexation scheme. Possibly he has discussed the matter with very few genuine Oaklanders. He has always maintained his law office in San Francisco, and when he was Mayor of this city devoted very little time to the consideration of Oakland affairs.

As for that eminent and enterprising citizen of the world Naph B. Greensfelder the people of Oak and while admiring his talents and the versatility of his activities are not disposed to accept him as the guardian of their interests or their leader in movements for civic betterment. They have no objection to his transferring his allegiance (and his presence) to San Francisco, but they are not prepared to follow his example or his leadership. Mr. Greensfelder's public services in this community however great and highly appreciated, have not convinced the inhabitants of Oakland of the wisdom of annexing this city to San Francisco and turning the water front over to the control of San Francisco politicians.

Dr. D. Evelyn does not sustain harmonious relations with the business men of Alameda and is comparatively unknown in Oakland. His gratuitous offer to annex all the cities on the Alameda shore to San Francisco will not excite enthusiasm in his home town neither will it tend to popularize the annexation scheme there.

Victor Robertson edit a trade paper in San Francisco, although he claims Berkeley as his place of residence. He has been clamoring for annexation ever since he began to board in Berkeley. He has never missed an opportunity to denounce and abuse Oakland. Hence his advocacy of annexation will not make it patriotic to Oaklanders.

No Mercy for These Brutes.

Civilized society breeds no creatures more loathsome than the degraded wretches who live off the earnings of women on street. They are the lowest order of human vermin. But acts of the class fully as degraded but more dastardly and far more dangerous to society—the jackals who extirpate the young women in houses of ill-fame and virtually sell them into a form of slavery that robs every moral sense and outrages every sense of decency. There is a sort of freemasonry between villains, so in this horrible trade they are ever on the alert to assist any member of their infamous order to escape the meshes of the law. Hence when one of them is arrested he can always count on the assistance of friends and money. Consequently it is inherent to their convictions. All sorts of criminal devices are resorted to by the police and officials in their efforts to suppress the tramps and punish the beasts engorged in it. Sometimes the beast gets a helping hand in police circles.

But now and then a white slave is caught and convicted. While convictions are rare, they should be an armed public sentiment demands greater vigilance on the part of officials and severer sentences for the criminal. As a matter of fact leniency to the debased wretches is without excuse. It is almost criminal. No mercy should be shown them. They are dangerous to be at large. They are outlawed from sympathy and entitled to no consideration. Hence judges should exact the full penalty of the law in every case of conviction. A real dog at large is far less dangerous than the enticer and the raver of young girls into lives of shame. Justice should be inexorable and merciless in dealing with them.

President Taft is making it plain to the country that if the pledges made in the Chicago platform are not redeemed, it will be no fault of his.

Secretary Ballinger has given fresh proof of moral uprightness by announcing that so long as he remains the head of the Interior Department he intends to ban no cattle and no other subordinates. How shameless of him! If he were disposed to do right he would choose for his subordinates ones who did not care who would plot to thwart his policies and his own career.

Portland is holding up in the census count better than any of the Pacific Coast cities. She is running close second to Seattle. The indications are that Oregon will show a population of the Oregon metropolitan area of 210,000. Seattle will then be more than 25,000. The Seattle figure gives out in climatic statement, placing Seattle's population at 200,000 and Portland at 210,000. Oakland and Los Angeles will both show more than 100 percent increase, but no indications are that the census will recognize either city there because this seems unverifiable.

Since the mine collapse in S. L. the Democrats have sustained another. In the city council Seaboard district of New York, its seat became vacant to fill the vacancy caused by the resignation of the P. A. which was found guilty of accepting a bribe. The seat goes to a man in seafaring, and the result was a win for Rep. Elihu Vining. The Democrats' characteristic loss gave birth to the returns coming in. The voters remained true to their party conventions. This evidence of political infidelity casts a dark shadow over the press of critics who can say we were right.

Ricardo Alfonsin, the old master of New York, may be coming down to a quiet retirement. It appears now that the Middle of New England State will present practically a solid front against the South. Virginia is the only Southern State thus far to vote for amendment. Nearly all the other Southern States will have done so before the year is out. The amendment of the Statute of Limitation in the Constitution and the 18th Amendment are brightly bright for having the assent of that number of states. The amendment would fail if the present rate of increase.

A contemporary says George V will be the eighth Guelph to occupy the throne of Great Britain. King George is not a Guelph properly speaking. Victoria was his wife. The family name of the Brunswicks is Guelph but when Queen Victoria married the Prince of Saxe Coburg she of course took the family name of her husband, which is Wettin. Thus George V belongs to the Hanoverian dynasty but his family name strictly speaking is that of the Coburgs. Wettin. Had Prince Albert become King instead of being made merely Prince Consort the house of Coburg would have succeeded the Brunswicks dynasty. However the distinction is not very material, but since the matter is deemed worthy of mention the statement might as well be correct. It should not be forgotten that the new King of England is a Dane.

Memorial to Woman Educator

In the beautiful memorial to Mrs. Elizabeth Palmer in the church of St. Paul's, Boston, the statue of Mrs. Palmer which has just been completed by Franklin M. Dill, is a life-size figure of the author of "The Education of the Negro," which is in the Boston Public Library. The statue is seated in a chair, holding a book in her left hand and a pencil in her right. Her hair is powdered white, and she wears a white dress with a lace collar and a lace hem. Her figure is very simple and dignified, having a quiet, winsome expression. The statue is surrounded by flowers and greenery, and the pedestal is inscribed with the names of the author's friends and admirers.

Mrs. Palmer was the author of "The Education of the Negro," which is in the Boston Public Library.

MANY THOUSAND PUPILS IN GARDEN CITY PARADE

**Great May Fair in San Jose Is Formally
Opened and Festivities Are
Inaugurated**

SAN JOSE, May 11.—Six thousand school children dressed in white, the pupils of each school wearing a distinctive decorative color in a parade that extended many blocks through the business portions of the city, was the chief attraction yesterday, the opening day of the great four days' carnival that opened this morning.

At City Hall Park, Miss May Marlette, presided by bunting and surmounted by an escort of 700 state normal students, was duly crowned queen of the carnival.

She led the parade set off at 11 o'clock yesterday, drawn by six white horses.

Other features this afternoon are

three races in the running park, a united

team of song in the auditorium by all

the churches, baseball and balloon ascension at Luna Park, and the day will conclude with a concert by 1000 school

children at 8 o'clock in the auditorium.

gently apparelled, and accompanied by

Director General J. H. Henry. The cer-

emony included several vocal choruses

with orchestra accompaniment, a shower

of roses in honor of the queen, and a

final chorus of 1000 voices.

At 1:30 o'clock the great May fair on

San Antonio street was opened, and a

half hour later the magnificent floral

show in the auditorium was opened to

the applause of the multitudes who

witnessed it.

Schwerin in Hiding; Report Is Undenied

Cuts in Expenditures Save City Large Sum

PORLTAND, O. May 11.—Reports of find R. P. Schwerin, a man in a suit of the Harrison wire lines who stated yesterday at the San Francisco and Portland Steamship Co. that he will extend his life to 12½ years' prostration awaiting last night. The report of the action of the San Francisco and Southern Company may cause a rift with the Pacific Coast Steamship Company, which is generally circulated in Portland marine circles. It being generally believed that the Pacific Coast Steamship Company is controlled by the Harrison interests.

Rockefeller Gives Away Paper Vests

NEW YORK, May 11.—In addition to publishing the "Rockefeller Fund," a monthly magazine giving away paper vests, every well-regulated home in New York has received a copy of the magazine and is invited to contribute to its success.

The oil man's monthly has been issuing young women in mid-maiden dress to get in touch with a woman who does a paper vest.

Arthur E. Gandy, president of the

Rockefeller Fund, has insisted that guests to the fair are to ride horses to the festival.

CONSOLIDATION PLAN IS URGED

Transbay Cities' Annexation to San Francisco Indorsed at Big Meeting

The San Francisco Call this morning said: "The time is ripe for an earnest energetic movement for a greater San Francisco." This was the opinion of the Greater San Francisco committee as expressed in a resolution presented by N. R. Gandy, president of Oak and adopted yesterday afternoon at a meeting in the Merchants' Exchange building.

There were in attendance representatives from about three-fourths of the cities in the Bay area, and in the resolution it was declared that much of the opposition to the movement which made it manifest six years ago has disappeared and that there is not a property owner in Oakland or Berkeley who is opposed to joining with San Francisco. The city opposition comes from the petit bourgeoisie who would prefer to be world-famous in 1915 than in 1910, according to Mr. Gandy.

He also said that the opposition from

Berkeley, Alameda and the section west of the city is to favor good government, doing business in San Francisco, but is strangled because they live across the bay. He brought about a change of feeling in this matter.

A report was made that there is a strong feeling in favor of annexing the northern end of San Mateo county as it is now, and the same day a resolution was passed to continue the experiments.

Mr. Whitbeck, of Berkeley, said all were sanguine that by the fall of the date of the meeting in San Francisco will be part of Greater San Francisco on the fourth system.

Secretary C. E. Edwards presented a lengthy report reviewing what the general committee had done and suggesting the idea of a permanent organization with office and office at an expense of \$500 a year for five years.

On motion of Joseph Rothschild, the committee was authorized to name an ad hoc committee of five to present a plan of campaign and consider the suggestions of the secretary.

Chairman Gandy tendered his resignation on the ground that he will be absent from the State and be unable to do the work to be done.

No action was taken on his resignation.

Police Save Butchers From Women's Attack

DETROIT, Mich., May 11.—Only the intervention of a lieutenant of police at the head of a squad of patrolmen saved ten meat dealers from violence last night when they attempted to exploit at a meeting of 500 consumers of kosher meat the reason for high prices.

Following the meat riot at Detroit's Hebrew Society, the patrons of the kosher market held a hall last night and invited the butchers to appear and tell why. A meat dealer attempted to do so, however, roots and a rush for his return by housewives greeted his return.

The women shouting at the tops of their voices were restrained with difficulty by the police. The meeting was finally adjourned until tonight.

Warmed Over Food Doomed by New Law

LOS ANGELES, May 11.—Under the terms of a new ordinance passed today by the city council, none backs shall be set up in future in hotel and restaurant dining rooms in this city. Food must be served in a glass dish or plate, placed before a guest, and the guest does not return to the kitchen or overcooks it merely because he is already satisfied.

It is felt that the Superior Court declared the original ordinance invalid because it declared that food once served must be consigned to a garbage can. It was held by the court that the original ordinance violated the law.

Therefore the council amended the ordinance to the extent of eliminating the garbage can clause.

Food which is bought hereafter may be eaten by hotel proprietors and attaches, or given away, but it must not be returned to the dining room.

BALLOON VICTIMS BADLY INJURED

A. Holland Forbes May Recover, But Astronomer Yates' Condition Critical.

GLASGOW, Ky., May 11.—Physicians in attendance on A. Holland Forbes, the New York aeronaut, and J. C. Yates, the New York astronomer who were injured yesterday in a balloon accident near Center Ky., returned this morning from a call to the aerodrome to report that Forbes' injuries are not serious, and that while they are uncertain about Yates' injury, they believe there is a chance for him to recover. Both men are conscious only at intervals.

Forbes, during conscious moments, made disconnected statements declar- ing that the balloon had passed over 12 towns of Illinois, Missouri, Tennessee and other States. He said they were over Illinois yesterday. He failed to say what happened to the balloon, but an aeronautic statement said that a leakage of gas furnished a possible blow. His statements about the gas caused some of the country people who heard about them to de- cide that the aeronauts had been overcome by escaping gas from the balloon, but the supposition was hardly borne out by anything Forbes said.

What appears certain is that con- trol of the balloon was lost. Its buoyancy was so far spent that a gust of wind or a sudden loss of gas sent it downward with great force.

The aeronauts are at Bruce's mill, replete from either wife or tail com-

munication.

FORBES A NOTED BALLOONIST.

NEW YORK, May 11.—In addition to publishing the "Rockefeller Fund," a monthly magazine giving away paper vests, every well-regulated home in New York has received a copy of the magazine and is invited to contribute to its success.

It is to be noted that it drifted until its

buoyancy was so far spent that a gust of wind or a sudden loss of gas sent it downward with great force.
